OBJECTIVE

Highly motivated CSE student with strong skills in Python, Java, C, and web technologies, seeking to apply technical and problem-solving skills to develop innovative software solutions and gain practical industry experience.

EDUCATION

Bachelor of Computer Science, Ganamani College of Technology

2023 - 2027

SKILLS

Technical Skills: Python, Java, C Programming

Web Technologies: React js, MYSQL(Core Web Development)

Core Competencies: Internet of Things (IoT)

EXPERIENCE

Full Stack Web Development

July 2026 - Sep 2026

Xenora Technologies

Coimbatore, Tamil Nadu

- Completed a Full Stack Web Development course covering HTML, CSS, JavaScript, Bootstrap, Tailwind CSS, React.js, Node.js, and Express.js. Gained practical experience with MongoDB, MySQL, REST APIs, CRUD operations, JWT authentication, Git/GitHub, and Postman. Developed responsive websites and full-stack applications, with experience in debugging, problem-solving, and deployment using Vercel, Netlify, and Render. Successfully developed real-world projects including responsive websites and full-stack applications, demonstrating strong problem-solving, debugging, and software development skills.

Data Analytics

July 2025 - Aug 2025

MSQUARE

Erode, Tamil Nadu

- Analyzed and processed datasets using Python, Pandas, and NumPy to identify trends and meaningful insights. Performed data cleaning, preprocessing, and exploratory data analysis (EDA) to improve data quality. Created visualizations and charts using Matplotlib to present analytical findings clearly. Used SQL for data extraction, filtering, and analysis to support data-driven decision-making.

PROJECTS

Development of line Follower Robot: Developed an autonomous robot using Arduino, IR sensors, and dual DC motors to follow predefined paths. Implemented real-time line tracking and speed control, enabling accurate navigation and automatic path correction. Optimized structural code execution to allow seamless negotiation of sharp curves, multi-lane intersections, and proactive line corrections without external inputs.

Arduino Obstacle Avoiding Robot: Built a self-navigating robot using Arduino Uno, ultrasonic sensors, and motor drivers. Implemented real-time obstacle detection within 20 cm and automatic reverse-and-turn movements for safe navigation. Implemented specialized motor driver routing to execute swift reverse-and-turn adjustments, establishing unbroken forward velocity over safe trajectory maps.

Portfolio Website: Personal Portfolio Website — React.js, HTML, CSS, JavaScript, Tailwind CSS. Developed a responsive personal portfolio website using React.js to showcase skills, projects, education, and experience. Implemented reusable React components with responsive layouts for desktop and mobile devices. Added interactive sections including About, Skills, Projects, Resume, Contact, and Footer. Used Tailwind CSS for modern UI design and deployed the website online for easy access.

EXTRA-CURRICULAR ACTIVITIES

- NPTEL Certification: Cloud Computing (National Programme on Technology Enhanced Learning)
- NPTEL Certification: Internet of Things (IoT)
- English Typewriting Proficiency: Technical Education Certification Board
